Ashwin Ugale

812-558-8718 | ugaleashwin@gmail.com | Portfolio | LinkedIn | Github

Summary

Software engineer experienced in full stack development and cloud infrastructure. Skilled in building scalable systems, automating development workflows, and delivering robust web and backend applications across modern tech stacks.

Skills Summary

Programming Languages: Python, Java, Go, C++, C, PHP, R
Systems & Networking: Linux, Shell Scripting, TCP/IP, Load Balancing, HTTP, DNS
Databases: SQL, MongoDB, Firebase, RDBMS, Oracle, MySQL, PostgreSQL
Web Development: React, Node.js, Spring Boot, Express, Bootstrap, HTML, CSS, JavaScript, MERN
Cloud & DevOps: GCP, AWS (EC2, S3, IAM, EKS, RDS), Docker, Kubernetes, GitHub Actions, Helm, Prometheus, Grafana, CI/CD
Tools & Practices: Agile, Git, Postman, REST APIs, Microservice Architecture, Data Structures & Algorithms

Experience

Live Risk Labs **June 2025 – Present**
Software Engineer NY, USA
- Developed infrastructure-as-code modules in Terraform to provision scalable GCP resources (VPCs, GKE clusters, IAM), improving environment consistency and reducing manual provisioning errors.
- Engineered secure, reusable base container images using Ansible and CIS benchmarks; integrated into CI pipelines to enable reliable deployments for backend services.
- Implemented GitOps workflows using ArgoCD and Terraform to automate infrastructure rollouts; enforced compliance with Checkov for policy-as-code scanning and deployment safety.

Hyphenova **June 2024 – December 2024**
Software Engineer Intern California, USA
- Enhanced frontend performance and modularity by building reusable React + TypeScript components with Redux, lazy loading, and code splitting.
- Optimized backend performance by implementing Redis for caching, session handling, and rate limiting in a Node.js + MongoDB stack, reducing DB load by 40%.
- Improved code reliability and team velocity by configuring GitHub Actions with Docker for testing, linting, and automated builds; enforced quality via Jest, ESLint, and Prettier with 85%+ test coverage.
- Streamlined release workflows by integrating versioned container deployments to GKE with rollback-safe CI/CD pipelines.
- Led Agile sprints and coordinated across frontend, backend, and QA to ensure timely, high-quality feature delivery.

Feuchr School of Excellence **May 2022 – July 2022**
Data Science Intern Mumbai, India
- Achieved 87% accuracy by building an insurance pricing model using structured patient data and Gradient Boosting.
- Reduced MAE by 25% through feature selection and cross-validation, outperforming a baseline Linear Regression model.
- Increased quote requests by 20% and user retention by 15% by delivering insights that improved quote personalization.

Projects

Cloud-Native Booking Platform | React, Node.js, Spring Boot, Kubernetes, GCP **Link** **Feb 2025 – May 2025**
- Built a microservices-based booking platform with React, Node.js and Spring Boot, deployed on GKE for improved scalability.
- Implemented CI/CD pipelines with GitHub Actions and Docker for automated deployments across environments.

Art Gallery Venue Booking System | MongoDB, Express, React, Node.js **Link** **Sep 2023 – Dec 2023**
- Developed a full-stack web application for venue discovery and booking using the MERN stack.
- Implemented real-time chat feature using WebSockets to streamline communication between hosts and clients.

Hospital Database Management System | PHP, JavaScript, HTML, CSS **Link** **July 2022 – March 2023**
- Reduced query response time by 30% through MySQL schema design, indexing, and query optimization.
- Developed modular components for payment, inventory, and staff management using PHP and JavaScript.

Certification

AWS Certified Developer – Associate | Link

Education

Indiana University Bloomington **August 2023 – May 2025**
Master of Science in Computer Science (GPA: 3.61/4) United States

K. J. Somaiya Institute of Technology **August 2019 – May 2023**
Bachelor of Technology in Electronics and Telecommunication Engineering (GPA: 8.99/10) India
