Education

Indiana University Bloomington **August 2023 – May 2025**
Master of Science in Computer Science (GPA: 3.61/4) United States

K. J. Somaiya Institute of Technology **August 2019 – May 2023**
Bachelor of Technology in Electronics and Telecommunication Engineering (GPA: 8.99/10) India

Experience

Hyphenova **June 2024 – December 2024**
Full Stack Developer Intern California, USA

- Built reusable and responsive **React + TypeScript** components with Redux, lazy loading, and code-splitting to improve frontend modularity and load performance.
- Developed REST APIs with **Node.js, Express, JWT, MongoDB**, and leveraged **Redis** for caching, session storage, and API rate limiting, reducing DB load by 40%.
- Set up **GitHub Actions** pipelines with Docker for testing, linting, and builds; enforced standards via **Jest, ESLint, Prettier** with 85%+ coverage.
- Deployed versioned containers to **GKE** using **CI/CD** workflows, enabling fully automated, rollback-safe releases.
- Led Agile development cycles and coordinated across frontend, backend, and QA to ensure on-time delivery and seamless integration of new features.

Feuchr School of Excellence **May 2022 – July 2022**
Data Science Intern Mumbai, India

- Built an insurance pricing model using structured patient data, applying **Gradient Boosting** to predict risk-adjusted premiums with **87% accuracy**.
- Improved model generalization via feature selection and cross-validation, reducing MAE by **25%** compared to a baseline Linear Regression model.
- Delivered insights that improved quote personalization, driving a **20%** increase in quote requests and **15%** rise in user retention.

Image Online **December 2021 – January 2022**
Machine Learning Intern Mumbai, India

- Analyzed multi-channel ad performance data (TV, newspaper, radio) to model revenue impact using **Random Forest Regression**.
- Performed EDA, correlation analysis, and feature scaling to improve model input quality, leading to a **20% improvement in prediction accuracy**.
- Uncovered actionable insights that informed media budget allocation, contributing to an estimated **15% increase in ROI**.

Projects

Cloud-Native Booking Platform | React, Node.js, Spring Boot, Kubernetes, Docker, GCP **Feb 2025 – May 2025**

- Built and deployed a microservices-based booking platform on **GKE** using **React, Node.js, Spring Boot, MongoDB**, and **Redis**.
- Automated CI/CD pipelines via **GitHub Actions, Docker, Helm**, and **Kubernetes** for versioned, environment-specific deployment.
- Integrated PayPal, TMDB, and Ticketmaster APIs with secure runtime config using **NGINX, ConfigMaps**, and **GCP Secret Manager**.
- Enabled observability via **Prometheus, Grafana, Fluent Bit**, and **GCP Cloud Logging**.
- Achieved **zero-downtime deployments** with rolling updates and enforced **high availability** using health probes and alerting.

Hospital Database Management System | PHP, JavaScript, HTML, CSS **July 2022 – March 2023**

- Led schema design, indexing, and query optimization in **MySQL**, reducing average query response time by **30%**.
- Developed modular components for payment, inventory, and staff management using **PHP and JavaScript**, enhancing system scalability and maintainability.
- Automated recurring workflows such as billing and scheduling, reducing administrative workload by **40%** and improving operational efficiency.

Skills Summary

Programming Languages: Python, Java, C++, C, PHP, R
Operating Systems: Linux, UNIX, BSD, Shell Scripting
Networking: TCP/IP, Load Balancing, HTTP, DNS, CDN
Databases: SQL, MongoDB, Firebase, RDBMS, Oracle, MySQL, PostgreSQL
Web Development: React, Node.js, Spring Boot, Express, Bootstrap, HTML, CSS, JavaScript, MERN
Cloud & DevOps: GCP, AWS (EC2, S3, IAM, EKS, RDS), Docker, Kubernetes, GitHub Actions, Helm, Prometheus, Grafana, CI/CD
Tools & Practices: Agile, Git, Postman, REST APIs, Microservice Architecture, Data Structures & Algorithms
