Ashwin Ugale

812-558-8718 | ugaleashwin@gmail.com | Portfolio | linkedin.com/in/ashwin-ugale/ | github.com/AshwinUgale

Summary

Software developer with experience in full-stack development, DevOps, and cloud infrastructure.Driven to build scalable software, streamline infrastructure, and deliver clean, production-ready code.

Education

Indiana University Bloomington **August 2023 – May 2025**
Master of Science in Computer Science (GPA: 3.61/4) United States

K. J. Somaiya Institute of Technology **August 2019 – May 2023**
Bachelor of Technology in Electronics and Telecommunication Engineering (GPA: 8.99/10) India

Skills Summary

Programming Languages: Python, Java, C++, C, PHP, R
Operating Systems: Linux, UNIX, BSD, Shell Scripting
Networking: TCP/IP, Load Balancing, HTTP, DNS, CDN
Databases: SQL, MongoDB, Firebase, RDBMS, Oracle, MySQL, PostgreSQL
Web Development: React, Node.js, Spring Boot, Express, Bootstrap, HTML, CSS, JavaScript, MERN
Cloud & DevOps: GCP, AWS (EC2, S3, IAM, EKS, RDS), Docker, Kubernetes, GitHub Actions, Helm, Prometheus, Grafana, CI/CD
Tools & Practices: Agile, Git, Postman, REST APIs, Microservice Architecture, Data Structures & Algorithms

Experience

Live Risk Labs **June 2025 – Present**
DevOps Engineer NY, USA
- Provisioned and managed GCP infrastructure using Terraform, including VPCs, GKE clusters, IAM roles, service accounts, and secure networking.
- Developed hardened golden images using Ansible and CIS benchmarks, integrating them into automated provisioning pipelines for consistent and compliant deployments.
- Streamlined GitOps deployment by integrating ArgoCD with GitHub Actions and Terraform workflows, enabling secure, policy-scanned (Checkov) and auto-synced infrastructure rollouts.

Hyphenova **June 2024 – December 2024**
Full Stack Developer Intern California, USA
- Improved frontend modularity and load speed by building reusable and responsive React + TypeScript components with Redux, lazy loading, and code-splitting.
- Reduced database load by 40% by using Redis for caching, session storage, and API rate limiting in a Node.js + MongoDB backend.
- Increased code reliability and team productivity by setting up GitHub Actions pipelines with Docker for testing, linting, and builds, and enforcing standards using Jest, ESLint, and Prettier with 85%+ test coverage.
- Enabled automated, rollback-safe deployments by integrating versioned container releases to GKE through CI/CD workflows.
- Ensured timely delivery of features by leading Agile sprints and coordinating across frontend, backend, and QA teams.

Feuchr School of Excellence **May 2022 – July 2022**
Data Science Intern Mumbai, India
- Achieved 87% accuracy by building an insurance pricing model using structured patient data and Gradient Boosting.
- Reduced MAE by 25% through feature selection and cross-validation, outperforming a baseline Linear Regression model.
- Increased quote requests by 20% and user retention by 15% by delivering insights that improved quote personalization.

Projects

Cloud-Native Booking Platform | React, Node.js, Spring Boot, Kubernetes, GCP **Link** **Feb 2025 – May 2025**
- Built a microservices-based booking platform with React, Node.js and Spring Boot, deployed on GKE for improved scalability.
- Implemented CI/CD pipelines with GitHub Actions and Docker for automated deployments across environments.
- Integrated third-party APIs including PayPal payments and TMDB movie data with secure configuration management.

Art Gallery Venue Booking System | MongoDB, Express, React, Node.js **Link** **Sep 2023 – Dec 2023**
- Developed a full-stack web application for venue discovery and booking using the MERN stack.
- Implemented real-time chat feature using WebSockets to streamline communication between hosts and clients.
- Built responsive React UI with secure Express routing and JWT-based authentication.

Hospital Database Management System | PHP, JavaScript, HTML, CSS **Link** **July 2022 – March 2023**
- Reduced query response time by 30% through MySQL schema design, indexing, and query optimization.
- Developed modular components for payment, inventory, and staff management using PHP and JavaScript.
- Automated billing and scheduling workflows, reducing admin workload by 40%.
